

NCSU Food Science Department

Chemotherapy Food Study

The food science department at North Carolina State University is conducting a study to determine any commonalities among chemo-therapy patients' food preferences. If you are a breast cancer patient currently undergoing chemo-therapy or who went through chemo-therapy within the last 6 months and would like to participate in the study, you can provide anonymous information on your food preferences during treatments. If you are interested please feel free to call or email any of the contacts listed.
